- **Carton Dimensions:** 32x32x127 cm
- **Carton Weight:** 7 kg

COMPOSITION:

- 12 traffic signs with attachment
- 1 traffic light with pole and base
- 6 poles, 120 cm in length
- 6 bases for positioning

Available colours

Instructions for use

The traffic signs are suitable for children aged 3 and up and should be used under adult supervision. Assemble the signs by inserting them into the poles and securing them to the bases, ensuring they are stable. Place the signs on a flat surface, free from obstacles, to create an educational pathway. The kit can be used both indoors and outdoors to teach children the meaning of road signs and safe behavior.

Periodically check the condition of the components to ensure their safety.

Cleaning instructions

Clean all components of the kit (traffic signs, poles, and bases) with a damp cloth and a mild, non-abrasive detergent to maintain the quality of the materials and colors over time.

Avoid using harsh cleaners that may damage the surfaces.

After use, store the kit in a dry place; if used outdoors, ensure all components are completely dry before storing them.

Quick and easy attachment

Scratch-resistant screen printed

Traffic light with working lights

Complete with base and pole. Functions can be operated manually or automatically. 4 AA batteries not included. Battery not included.

Ballast spherical base
